Thach H. **Pham**

PhD, Asset Pricing

Lecturer, Faculty of Finance & Banking, HCMC Open University, Vietnam

phamhoangthach@gmail.com | thachpham.wordpress.com | pham-hoang-thach | phamhoangthach

I like collaborative environments where I can learn from my peers. I have worked in a variety of roles ranging from financial and data analyst to investment officer to researcher and lecturer. I am passionate about education and I believe that none of subject is too complex if the teacher is empathetic and willing to think of new approaches. In my PhD thesis, I have developed a framework for stock selection strategies based on mispricing and smart betas. This framework not only helps in explaining stock returns but also in evaluating the efficiency of stock markets and trading strategies. I am using Linux and free and open-source softwares. I prefer literate programming, reproducible research, and plain text.

Education

Victoria University — *Melbourne, Australia*
PhD, Asset Pricing — *2023*

University of Wollongong — *NSW, Australia*
MCom, Finance — *2010*

IBM Advanced Career Education — *HCMC, Vietnam*
